## **DETAILED ACTION**

This office action is in response to the filing of the amendment on 8 February 2007. Claims 1-8 and 10-22 are pending; claim 9 has been cancelled; claims 10-22 have been withdrawn from consideration.

#### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please cancel claims 10-22.

# Allowable Subject Matter

Claims 1-8 are allowed.

## Reasons for Allowance

The following is an examiner's statement of reasons for allowance: prior art does not anticipate, teach, or suggest placing a lid on the housing along the solderable interface portion and exposing the housing to temperatures sufficient to reflow the palladium layer to form a solder seal between the housing and the lid.

Art Unit: 2822

For example, Hosoi (JP 61-058259) discloses a process for preparing an electronic package where a ceramic housing as an internal cavity for receiving a micro device and having at least one interface portion; treating the housing to form a tungsten layer on the interface portion; and overlaying a palladium layer on the tungsten layer on the interface portion to render it a solderable interface portion suitable for soldering to another component. However, Hosoi does not disclose, anticipate, teach, or suggest placing a lid on the housing along the solderable interface portion and exposing the housing to temperatures sufficient to reflow the palladium layer to form a solder seal between the housing and the lid.

Peterson et al. (6,674,159) disclose a process for preparing an electronic package where a ceramic housing defines an internal cavity for receiving a micro device and having one or more interface portions; treating the housing to form a tungsten layer on the interface portions; and overlaying a layer on the tungsten layer. Peterson et al. further disclose applying a protective coating on the layer. However, Peterson et al. do not disclose, anticipate, teach or suggest overlaying a palladium layer on the tungsten layer on the interface portion and placing a lid on the housing along the solderable interface portion and exposing the housing to temperatures sufficient to reflow the palladium layer to form a solder seal between the housing and the lid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
